

FLAMINGO

Fabrication of Lightweight Aluminium Metal matrix composites and validation In Green vehicles

Deliverable D9.9
*Report on the standardization and regulatory landscape and
applicable standards*

Lead Beneficiary

EWF

Delivery Date

31st January 2022

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the grant agreement number 101007011

1. Publishable Executive Summary

To facilitate the acceptance and utilization of the FLAMINGo project outcomes by the market, Task 9.5 - Standardization and Regulatory issues aims at not only promoting the integration of project success results in future standards revisions but also ensuring compatibility and interoperability with what already exists in the market through standards.

This document, D9.9, intends to define the standardization and regulatory landscape of the FLAMINGo project developments and technologies, by compiling the relevant standards and regulations related to the FLAMINGo activities. Making an early identification of the necessary requisites to deliver FLAMINGo project activities will assure post-market implementation. Additionally, the early identification of Standards will also allow future identification of possible standardization gaps.
